Mr. Robert M. Gates
Director, Central Intelligence Agency
Administrative & Technical Support Activities
Washington, D.C. 20505

Dear Mr. Gates:

The Federal Space Evaluation Committee (FSEC) recently noted the unique characteristics of the Ship Point facility in Solomons, Maryland, and in particular, how it could be ideal for conducting "special activities" of certain agencies of the United States Government.

As a consequence of their general observations, a list was prepared of these organizations, and the Ship Point Limited Partnership was encouraged to make this group knowledgeable about the facility. Based upon preliminary conversations, we have gathered that the "anticipated" client/user would view this complex as very appropriate, where specific program needs demanded highly securable space in an environment which is isolated from the more public programs of the agency.

In order to meet our responsibility of a "targeted" marketing approach, we have addressed this information to you, fully realizing that others within your organization would be designated for follow thru, if conditions dictated. The enclosed brochure and floor plans will provide you with a substantial amount of information about the complex.

I feel compelled to apologize for addressing this to you under the label of "PERSONAL". Unfortunately, in large organizations, and most especially in government, it is difficult for an outsider to identify the appropriate person(s) who would directly handle such matters. By placing this initially in your hands, I am confident that it will receive proper internal routing.

For further information, or arrangements for a site tour, please contact either Skip Gardiner or Art Held at 301-261-6250. In that we have dealt with some very "sensitive" space requirements in the past, we are cognizant of the need to maintain confidentiality.

Sincerely,

Ship Point Limited Partnership
